#### MR. COHEN RETURNS.

The Month of August Will Show Fine Record for Mercur.

Manager A. H. Cohen came in yester-Manager A. H. Cohen came in yesterday from California where he has been looking after operations at Gold Mountain and Bully Hill. The new mill at the former place is now in operation Mr. Cohen was busy today looking over the reports from the big mill at Mercurahich are most gratifying. The report for the month will probably not begiven out until after the Bullion is disposed of, which will be about the 15th of September. The ore milled for the month will be about the 15th of September. The ore milled for the month will be about so, which month will be about \$1,000 tons, which Mr. Cohen says will average about \$ per ton in value. The extraction is excellent, the value in the tallings some times running as low as 80 cents per ton. While it runs a little over 9 ton. While it runs a little over 30 cents at times the average does not exceed 86 cents. Nothing better shows the wonderful accuracy of the mechanical and chemical operations at the big mill. This is especially gratifying when it is considered that the value of the tailings at the old Mercurr mill sometimes went over \$2 and were seldom lower than \$1.60 per ton.

Seesking of dividends Mr. Cohen said, it cannot be said exactly what the diit cannot be said exactly what the di-rectors will do, but he looks for the divi-lends to exceed \$75,000 per month.
